

TREVOR

Trevor is a traction engine. He's like a farm tractor, but he is also a steam engine like Thomas.

Trevor works in the Vicarage Orchard, where he pulls trailers of fruit and sometimes gives children rides.

Trevor has wide metal wheels that grip the ground and stop him sinking into the mud.

His steam engine turns a heavy flywheel that turns his wheels.

REALLY USEFUL FACT

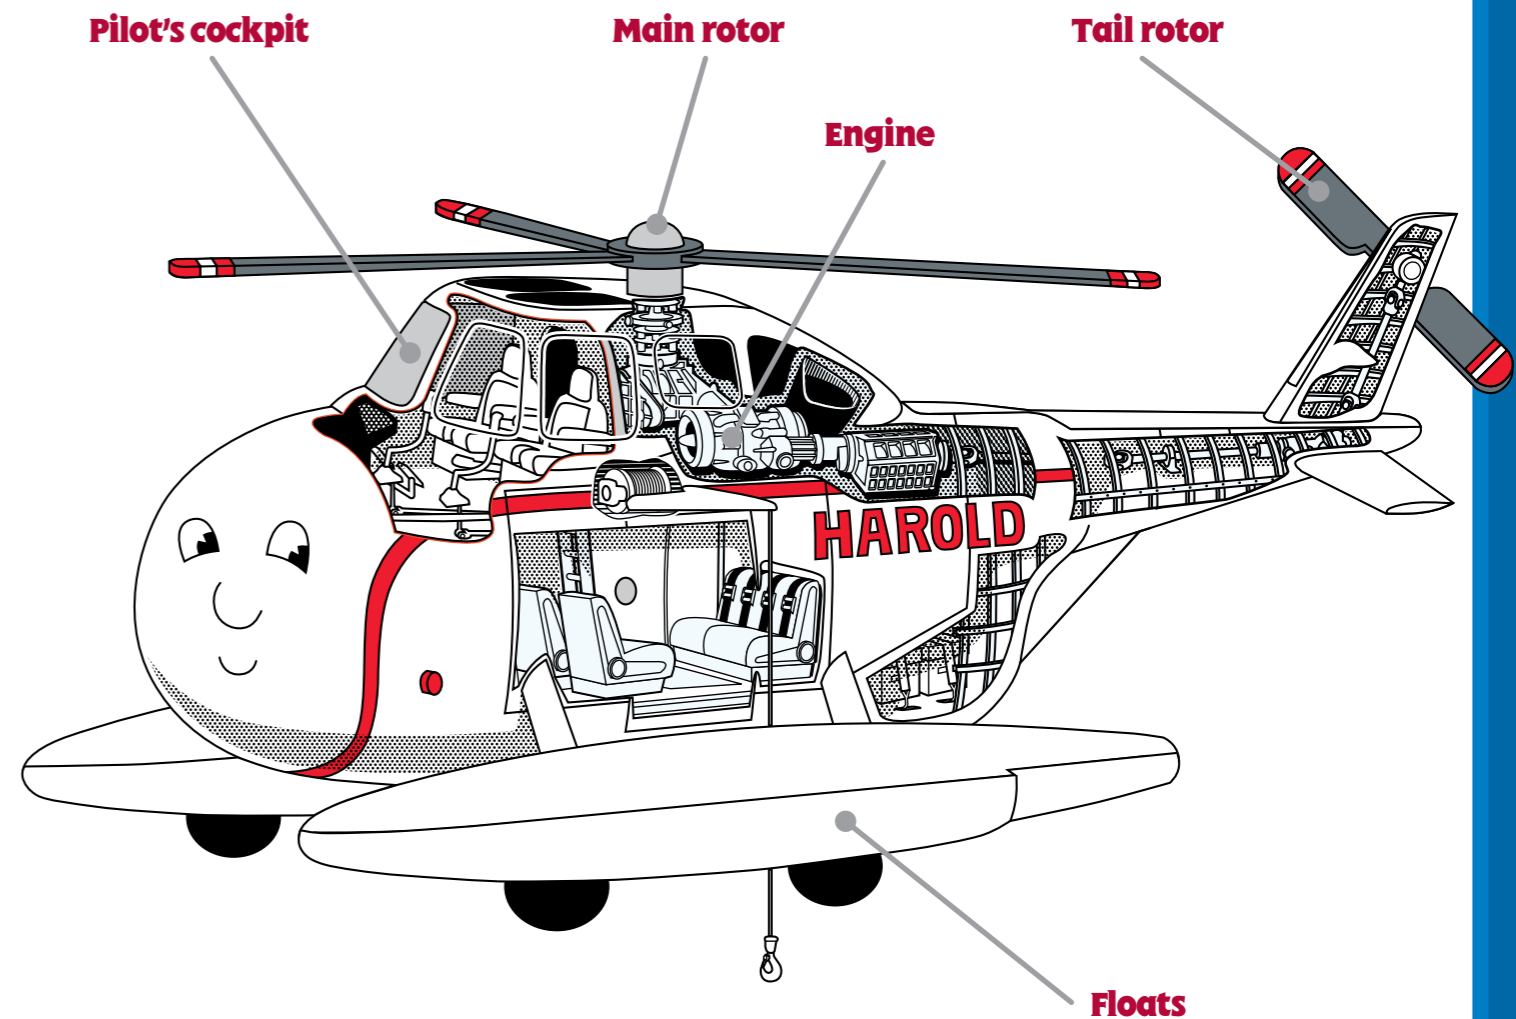

Traction engines like Trevor can work farm machines too.

HAROLD

Harold is a helicopter, who is often seen flying over Sodor.

Harold's rotor spins round very fast. When it's spinning it lifts Harold into the air.

Harold has floats for landing on water and wheels for landing on the ground.

REALLY USEFUL FACT

Thomas and the other engines call Harold "Whirlybird" because his rotor whirls round.
